

TASK #3

Favorite Word.

Using the periodic table (and not the internet), construct your favorite word using chemical element abbreviations.

For example: F1 O W Er
(Flerovium, Oxygen, Tungsten, Erbium)

Note: you can use the internet to view the periodic table but not to assist you in developing your word.

When you have the word, text it to Becky (603-858-9477).

You have 1 week. Your time starts now.
